

**JUST LIGHT.**

## Removal instruction 901721/901713/901722/901720

Instructions on how light sources and separate control gears can be removed without being permanently damaged for verification purposes by market surveillance authorities:

An Instruction on how to remove the light source from a containing product is provided for reference:

The removal may only be carried out by a professional.

Step 1: Carefully insert the screwdriver into the edge of the lampshade and remove the lampshade.

Step 2: Carefully insert the screwdriver into the edge of the glass lens and then remove the glass lens.

Step 3: Carefully use a screwdriver to remove the screws that fix the LED light board.

Step 4: Use pliers carefully to cut the wires connecting the light board.

Step 5: Pull the light source out of the containing product.

Step 6: An individual light source is removed out of the containing product.

Step 7: Fix a new connection wire to the light source by using electric iron. Take care of the LEDs during this step, do not touch them.

Step 8: Provide the rated current to the light source and operate the ErP testing.
